

What if I am a close contact of a close contact?

Close contacts of close contacts WHO LIVE IN THE SAME HOUSEHOLD must quarantine until the close contact receives a negative PCR test or TMA test taken no less than 5 days following the last possible exposure to a positive case.

Students and staff who are fully vaccinated for COVID-19 are not required to quarantine if they are identified as close contact of close contacts. However, they must monitor for symptoms for 14 days after contact and must quarantine and test if symptoms develop.
