December 21, 2020

Dear Shapleigh School families and staff...

I am sharing a letter with you detailing a positive COVID-19 case that was brought to my attention just an hour ago. You will note in the letter that there are no close contacts connected with this case.

As we continue to deal with this pandemic, I wanted to ask for your help during the upcoming December break:

- If anyone in your household develops COVID-19 symptoms, please call your healthcare provider.
- If your student is tested for COVID-19, please share the results (**positive or negative**) with your school nurse via email, scan, or fax: sstathoplos@kitteryschools.com, bbladen@kitteryschools.com, bburke@kitteryschools.com
- If your student has any COVID-like symptoms or if he/she was in contact with anyone who tested positive for COVID-19, please email your school nurse with that information: sstathoplos@kitteryschools.com, bbladen@kitteryschools.com, bburke@kitteryschools.com

Our school nurses will respond to email communication as early as January 2, 2021.

Enjoy your day.

Sincerely,

Eric Waddell
Superintendent of School

December 21, 2020

Dear Staff, Students, and Families:

This letter is to inform you that an individual associated with Shapleigh School recently tested positive for Coronavirus Disease 2019 (COVID-19). Since the individual's last day on campus was December 15, there are no close contacts linked to this case. We are informing you out of an abundance of caution. Please monitor yourself/your student for signs and symptoms. Call a health care provider if symptoms start. It is important that you call a health care facility before you show up in person. Stay home if you are sick. Please call your student's school nurse if your student develops symptoms, tests positive, or anyone in your household tests positive for COVID-19.

COVID-19 is a respiratory illness that ranges from mild to severe. It can be more severe in adults 60 years and older and in those with underlying conditions. The virus mainly spreads when an infected person coughs or sneezes and an uninfected person breathes in the virus. Signs and symptoms include:

- fever or chills
- fatigue
- sore throat
- nausea or vomiting
- cough
- headache
- diarrhea
- congestion or runny nose
- shortness of breath or difficulty breathing
- muscle or body aches
- new loss of taste or smell

Please keep in mind that many things can cause respiratory illness, so students and staff should be up-to-date on influenza and routine vaccinations.

Maine CDC or a school representative will contact you directly if you are identified as a close contact of someone who tested positive. Close contacts will be asked to quarantine for 14 days from the last exposure to the positive individual, or for 10 days with a negative PCR test no less than 5 days from the last exposure. A negative test result does not get an individual out of quarantine.

Maine CDC recommends prevention measures to prevent the spread of COVID-19. These measures include proper handwashing with soap and warm water, which is especially important after using the bathroom, before eating, and after blowing your nose, coughing, or sneezing. When soap and water is not available, use an alcohol-based hand sanitizer with at least 60 percent alcohol. Avoid touching your eyes, nose, and mouth with unwashed hands and avoid close contact with people who are sick. Cover your cough or sneeze into a tissue, then throw the tissue in the trash. Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

Questions for the school can be directed to Ms. Bladen, RN by calling 207-439-2572. For general COVID-19 questions, dial 211 (or 1-866-811-5695). You can also text your ZIP code to 898-211 or email info@211maine.org. Call a health care provider for questions about your symptoms. More information can be found at: www.maine.gov/dhhs/coronavirus or www.cdc.gov/coronavirus.

Sincerely,

Eric Waddell
Superintendent of Schools
