December 12, 2020

Good morning Shapleigh School families and staff...

I received confirmation late Friday afternoon that an individual associated with Shapleigh School has received a positive COVID 19 test. As noted in the attached letter (a required communication by the Maine CDC and Maine DOE), the individual has not been on the campus of Shapleigh School since the Tuesday prior to Thanksgiving, so there are no close contacts.

I continue to emphasize the critical importance of following The Kittery Promise and especially the Daily Self Check (attached). Doing so will keep our students, staff, and their families safe, and it will keep our schools open.

Enjoy the weekend.

Sincerely,

Eric Waddell
Superintendent of Schools

Dear Staff, Students, and Families:

This letter is to inform you that an individual associated with Shapleigh School recently tested positive for COVID-19. Since the individual has not been on campus since November 24th, there are no close contacts associated with the school. We are informing you out of an abundance of caution. Please monitor yourself/your student for signs and symptoms. Call a health care provider if symptoms start. It is important that you call a health care facility before you show up in person. Stay home if you are sick. Please call your student's school nurse if your student develops symptoms, tests positive, or anyone in your household tests positive for COVID-19.

COVID-19 is a respiratory illness that ranges from mild to severe. It can be more severe in adults 60 years and older and in those with underlying conditions. The virus mainly spreads when an infected person coughs or sneezes and an uninfected person breathes in the virus. Signs and symptoms include:

- fever or chills
- fatigue
- sore throat
- nausea or vomiting
- cough
- headache
- diarrhea
- congestion or runny nose
- shortness of breath or difficulty breathing
- muscle or body aches
- new loss of taste or smell

Please keep in mind that many things can cause respiratory illness, so students and staff should be up-to-date on influenza and routine vaccinations.

Maine CDC or a school representative will contact you directly if you are identified as a close contact of someone who tested positive. Close contacts will be asked to quarantine for 14 days from last exposure to the positive individual. A negative test result does not get an individual out of quarantine.

Maine CDC recommends prevention measures to prevent the spread of COVID-19. These measures include proper handwashing with soap and warm water, which is especially important after using the bathroom, before eating, and after blowing your nose, coughing, or sneezing. When soap and water is not available, use an alcohol-based hand sanitizer with at least 60 percent alcohol. Avoid touching your eyes, nose, and mouth with unwashed hands and avoid close contact with people who are sick. Cover your cough or sneeze into a tissue, then throw the tissue in the trash. Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

Questions for the school can be directed to Brenda Bladen, RN by calling 207-439-2572. For general COVID-19 questions, dial 211 (or 1-866-811-5695). You can also text your ZIP code to 898-211 or email info@211maine.org. Call a health care provider for questions about your symptoms. More information can be found at: www.maine.gov/dhhs/coronavirus or www.cdc.gov/coronavirus.

Sincerely,

Eric Waddell
Superintendent of Schools
