January 28, 2021

Dear Shapleigh School families and staff...

Ms. Bladen contacted me this morning to let me know of a new positive COVID 19 case connected to Shapleigh School. Fortunately, the individual has not been on campus this year. Nevertheless, we wish this individual a speedy recovery, and we use it as a reminder to all that if you are feeling sick (even with symptoms that you would normally consider just a 'little cold'), stay home!

The CDC-mandated letter is attached. Questions? Contact Principal Ellis or Ms. Bladen, RN at Shapleigh School (207-439-2752).

Sincerely,

Eric Waddell
Superintendent of Schools

Dear Staff, Students, and Families:

This letter is to inform you that an individual associated with Shapleigh School recently tested positive for Coronavirus Disease 2019 (COVID-19). **There are no close contacts since the individual has not been on campus this school year.** We are informing you out of an abundance of caution. Please monitor yourself/your student for signs and symptoms. Call a health care provider if symptoms start. It is important that you call a health care facility before you show up in person. Stay home if you are sick. Please call your student's school nurse if your student develops symptoms, tests positive, or anyone in your household tests positive for COVID-19.

COVID-19 is a respiratory illness that ranges from mild to severe. It can be more severe in adults 60 years and older and in those with underlying conditions. The virus mainly spreads when an infected person coughs or sneezes and an uninfected person breathes in the virus. Signs and symptoms include:

- fever or chills
- fatigue
- sore throat
- nausea or vomiting
- cough
- headache
- diarrhea
- congestion or runny nose
- shortness of breath or difficulty breathing
- muscle or body aches
- new loss of taste or smell

Please keep in mind that many things can cause respiratory illness, so students and staff should be up-to-date on influenza and routine vaccinations.

Maine CDC or a school representative will contact you directly if you are identified as a close contact of someone who tested positive. Close contacts will be asked to quarantine for 14 days from last exposure to the positive individual, or for 10 days with a negative PCR test no less than 5 days from the last exposure. A negative test result does not get an individual out of quarantine.

Maine CDC recommends prevention measures to prevent the spread of COVID-19. These measures include proper handwashing with soap and warm water, which is especially important after using the bathroom, before eating, and after blowing your nose, coughing, or sneezing. When soap and water is not available, use an alcohol-based hand sanitizer with at least 60 percent alcohol. Avoid touching your eyes, nose, and mouth with unwashed hands and avoid close contact with people who are sick. Cover your cough or sneeze into a tissue, then throw the tissue in the trash. Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

Questions for the school can be directed to Brenda Bladen, RN by calling 207-439-2572. For general COVID-19 questions, dial 211 (or 1-866-811-5695). You can also text your ZIP code to 898-211 or email info@211maine.org. Call a health care provider for questions about your symptoms. More information can be found at: www.maine.gov/dhhs/coronavirus or www.cdc.gov/coronavirus.

Sincerely,

Eric Waddell
Superintendent of Schools
