Truth & Knowledge

Eric F. Waddell • Superintendent of Schools • ewaddell@kitteryschools.com • (207) 475-1334

January 5, 2021

Good afternoon...

I learned this morning that two individuals from the same household connected to Traip Academy have received a positive COVID 19 test. Fortunately, **there are no close contacts** associated with the school since the individuals were last on campus on Friday, December 18th.

The Daily Self Check for both students and staff is a critical component of our mitigation efforts. I've attached it here for your continued daily reference. Of course, mask-wearing, physical distancing, and maintaining a small and stable cohort are all very effective ways to keep this virus at bay.

I have also attached a CDC-mandated letter detailing the positive cases at Traip Academy.

Be safe!

Sincerely,

Eric Waddell
Superintendent of Schools

Dear Staff, Students, and Families:

This letter is to inform you that two individuals associated with **Traip Academy** recently tested positive for Coronavirus Disease 2019 (COVID-19). **There are not close contacts since the individuals have not been on our school campus since December 18th.** We are informing you out of an abundance of caution. Please monitor yourself/your student for signs and symptoms. Call a health care provider if symptoms start. It is important that you call a health care facility before you show up in person. Stay home if you are sick. Please call your student's school nurse if your student develops symptoms, tests positive, or anyone in your household tests positive for COVID-19.

COVID-19 is a respiratory illness that ranges from mild to severe. It can be more severe in adults 60 years and older and in those with underlying conditions. The virus mainly spreads when an infected person coughs or sneezes and an uninfected person breathes in the virus. Signs and symptoms include:

fever or chills	cough	shortness of breath or difficulty breathing
fatigue	headache	muscle or body aches
sore throat	diarrhea	new loss of taste or smell
nausea or vomiting	congestion or runny nose	

Please keep in mind that many things can cause respiratory illness, so students and staff should be up-to-date on influenza and routine vaccinations.

Maine CDC or a school representative will contact you directly if you are identified as a close contact of someone who tested positive. Close contacts will be asked to quarantine for 14 days from last exposure to the positive individual, or for 10 days with a negative PCR test no less than 5 days from the last exposure. A negative test result does not get an individual out of quarantine.

Maine CDC recommends prevention measures to prevent the spread of COVID-19. These measures include proper handwashing with soap and warm water, which is especially important after using the bathroom, before eating, and after blowing your nose, coughing, or sneezing. When soap and water is not available, use an alcohol-based hand sanitizer with at least 60 percent alcohol. Avoid touching your eyes, nose, and mouth with unwashed hands and avoid close contact with people who are sick. Cover your cough or sneeze into a tissue, then throw the tissue in the trash. Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.

Questions for the school can be directed to Betsy Burke, RN at Traip Academy by calling 207-439-1121. For general COVID-19 questions, dial 211 (or 1-866-811-5695). You can also text your ZIP code to 898-211 or email info@211maine.org. Call a health care provider for questions about your symptoms. More information can be found at: www.maine.gov/dhhs/coronavirus or www.cdc.gov/coronavirus.

Sincerely,

Eric Waddell
Superintendent of Schools
