

## Facilities Director

Mark Everett

June 2020

- **What challenges did you and your department need to overcome when we entered a remote learning deployment?**

One of my biggest challenges was keeping materials in stock to do our job cleaning and sanitizing. Many of the products we use would be out of stock. It was very important to have products with the kill factor that is effective against Covid-19. I had to research a lot and make substitutions at times. My staff worked on projects that were on the to-do list for a while. The need for disinfecting was satisfied throughout the day on all touch points for those entering the facilities to pick up, drop off or work on site.

- **Looking forward and recognizing that 'business as usual' may not be upon us in the fall, how will you adjust in order for your department to meet the needs of our students?**

We would need to be doing more of what we did at the end of the year. Including more time spent sanitizing to control the spread of the virus and ensure our facilities are safe for those that do enter the building and work on site.
